

Experts See Flaws In Carranza's Plan For Federal Bank

State Banks of Issue Are Urged as Aid to Trade and to Restore Confi- dence in Financial World

WASHINGTON, May 12.—The proposed establishment of a Federal Bank of Mexico, which shall be the sole bank of issue in the Republic, as advocated by President Carranza, has attracted the attention of bankers of Europe and the United States, according to advices received to-day from Mexico City.

The Mexican government has been warned that if it is hoped to obtain a foreign loan, which Mexico realizes is imperative, certain modifications must be made in the law proposed by Carranza, in order to create confidence abroad and consolidate private and public credit. Financial legislation is

one of the subjects to be taken up at the present extra session of the Mexican Congress, according to the call issued by the Executive.

Friends of Carranza, the advices state, have urged upon him to reestablish the banking system perfected by the Limantour system under the regime of Don Porfirio Diaz, with certain amendments. This may be done, but it is believed Carranza has in mind radical changes from the Limantour system.

The invitation extended by Carranza to Limantour to return to Mexico and resume his former position in the affairs of the Republic indicates to some that Carranza has reached the point where he is willing to take the advice of an expert on finance after several rebuffs from foreign bankers.

"El Universal," is urging upon the president the wisdom of accepting the advice of the foreign bankers because, it says: "A sound banking credit would, no doubt, contribute to a rapid development of national trade and national industry. At this moment, when the eyes of the world are fixed on the Mexican Congress, the realization of this truth may be of incalculable benefit to the immediate future of the country."

During the revolutionary period the thirty state banks of issue established under the Limantour regime have either been wrecked, looted or confiscated. In the legislation proposed by Carranza it is not proposed to reestablish those banks as banks of issue, that privilege to be the sole right of

the Federal bank. Foreign interests have pointed out to Carranza that the state banks of issue rendered valuable aid to trade and industry throughout the Republic in former days and the reestablishment of these banks would be a step toward regaining the confidence of banking houses upon whom he must call for aid.

Villa Retakes Parral; Frees Prisoners, Tells Them to Go to Work

EL PASO, Tex., May 12.—According to information received here from Parral to-day, Francisco Villa retook that city Thursday and made prisoners of the garrison of 200 men under Colonel Gomez, who had occupied the town but two days before.

The garrison was outnumbered and made little resistance. Repeating his action when he took Parral on Easter Sunday, Villa freed the prisoners and told them to go to work. Casualties were light on both sides.

Colonel Gomez, commander of the garrison, escaped during the engagement. Villa commanded the attack in person. The exact number of men in his command is not known.

WASHINGTON, May 12.—Five bridges on the branch of the National Railway of Mexico, between Torreon and Chihuahua City, have been destroyed by Villista forces, according to advices received here from Mexico City. The dispatches said that when traffic is restored every train will be preceded by an "exploring train," carrying a guard of Federal troops large enough to repulse any rebel raid.
